

Cybersecurity Risk Register

Operational Environment

The bank is located in a coastal area with low crime rates. Many people and systems handle the bank's data—100 on-premise employees and 20 remote employees. The customer base of the bank includes 2,000 individual accounts and 200 commercial accounts. The bank's services are marketed by a professional sports team and ten local businesses in the community. There are strict financial regulations that require the bank to secure their data and funds, like having enough cash available each day to meet Federal Reserve requirements.

Risk Assessment Table

Asset	Risk(s)	Description	Likelihood (1-3)	Severity (1-3)	Priority Score
Funds	Business email compromise	An employee is tricked into sharing confidential information.	3	2	6
Funds	Compromised user database	Customer data is poorly encrypted.	2	3	6
Funds	Financial records leak	A database server of backed up data is publicly accessible.	3	3	9
Funds	Theft	The bank's safe is left unlocked.	1	3	3
Funds	Supply chain disruption	Delivery delays due to natural disasters.	3	2	6

Analyst Notes

Despite detailed staff instructions and the implementation of strict security rules, there is always the possibility of human error and social engineering attacks. Due to the location in the coastal zone, there is a fairly high risk of disruption of business continuity due to natural

influences. Doing business with external marketing partners might increase the risks to data since it presents other avenues for information compromise.
